

MDS Prompt to Allow Changes

While completing an MDS assessment you are often asked whether you wish to allow a skip pattern or other change to be applied,

Or removed,

Some of you have reported that with all the various patterns in today's assessments, this is "becoming a bit annoying". **You now have the option of allowing the system to automatically answer YES to these questions which will prevent the question from popping to the screen at all.**

This ability is set per user. Some staff can elect to continue seeing the prompts as they do currently while others can elect to turn the prompts off:

- I want to see each of the prompts and decide for myself whether to skip. You don't have to do anything.
- I do not want to see the prompts. I want the system to automatically allow the changes. You have an easy mouse click to do.

Turning prompts off -

MDS 3.0 – Record Management – Disable MDS Prompt for Skips

When you click on the menu option, it will disable the prompts and they will no longer appear. As you process the MDS assessments, skip/change patterns will automatically be answered YES and applied. Note, any suggested changes to dates will always trigger the prompt so that you are aware.

Turning prompts on –

MDS 3.0 – Record Management – Enable MDS Prompt for Skips

If you tried the disable feature and do not like seeing when the changes are prompted, you can enable them again. Simple click on the menu option to make them visible again.
