

Resident Management System Clinical Notes

The Clinician Notes module allows for comprehensive resident documentation. The module was developed specifically for RMS network users that have a networked computer on each nursing station and may utilize an optional true electronic signature.

Versatile reporting can be sorted by keyword, resident, unit, facility, or discipline between any two user-selected dates. Our Shift Report is divided into Problems, Interventions, and Evaluations. Use of a hotkey pops a selection grid of possible responses for each section. Basic selections can be edited to create resident specific details.

Included in the module are the following: Shift Reports, Progress Notes, Vital Signs Monitoring and reporting (i.e. weight gain/loss), Treatment Notes, and Physician Notes.

General Features:

- Progress notes (clinician notes), shift reports, vital signs monitoring and reporting (i.e. weight gain/loss), and physician notes are available for tracking.
- All notes may be marked as related to a specific area of concern such as pressure sores, antibiotics, pain etc.
- Versatile reporting allows you to sort by keyword, resident, unit, facility, discipline, or a user entered date range.
- Electronic signature capability is available.

Important Features:

Track notes electronically with the ability to sort by keyword, resident, unit, facility, discipline, or date range.

Selection grids specific for problems, interventions, and evaluations make basic entry quick and easy. The ability to edit those responses allows you to detail notes specific to every resident/
