

Employee Management System Accident and Incident Tracking

This module allows for the tracking of staff incidents and accidents. Facility configured, this module allows for the entry of facility specific information such as locations or sites.

Easy data input utilizes selection from “pop-up” lists which also provide extremely fast incident/accident record generation.

Detailed reporting by date, unit, type of accident, etc. simplifies the task of accident and incident tracking. The clear reports, including an audit report, provide data necessary for mandated compliance reporting and internal quality assurance.

General Features:

- Ability to configure the data for facility specific concerns such as locations, causes, types, etc. This data is then available from selection drop downs when you enter an accident/incident.
- Comply with completion of OSHA forms.
- Produces reports by employee, unit, month, time period, etc.
- Full edit and delete capability for those having the appropriate level of rights.

P & N P COMPUTER SYSTEMS, INC.

66 North Main Street
Brockport, NY 14420

Phone: 585-637-3240

Fax: 866-670-2234

E-mail: sales@pnpcomputer.com

Important Features:

Facility is able to define all of the parameters that are important (such as location, witness, injury, treatment, impact on ability to do work, etc) so that reports are meaningful and contain the data that YOU need to see.

Input is defined through drop down menus containing the facility's parameters so input is consistent.
