

Resident Management System Overview

P&NP's software packages are specifically designed to meet all of the information management needs of the modern, long-term care facility. Our systems are truly multi-user and are network compatible, supporting up to 1000 workstations while still maintaining centralized and synchronized data management.

The Resident Management System (RMS) is the primary electronic medical record, clinical tracking system, and decision support package in the P&NP line. It is modular and can be configured to meet the precise needs of your facility.

At the core of the system is an advanced Admission, Discharge, and Transfer (ADT) system and a powerful Census module. Once data are entered into these modules, they are available to all other RMS modules and other software packages. Since the system is modular, it can be enhanced at any time with additional modules as your needs change. When the facility desires, RMS information can be integrated with our other systems in human resources (Employee Management System, EMS) and finance (Financial Management System, FMS).

Primary Core Modules:

Admission, Discharge, and Transfer and Census.

Electronic Health Record:

Care Area Assessment, Resident Observations, and Resident Scheduling with Quick Tracker. Features include electronic signatures and document management.

Other Clinical Modules:

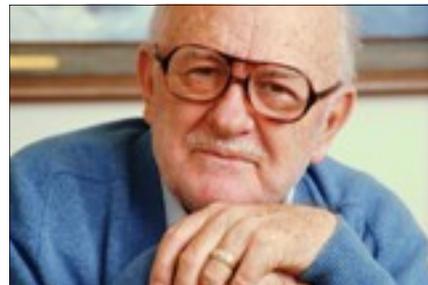

MDS 3.0, Care Plans, Clinician Notes, Infection-TB-Immunization Tracking, Risk Management, Resident Activity Scheduling, Mars/Forms, and Pharmacy.

Resident Financial Modules:

Billing, Cash Receipts, Accounts Receivable Reporting, and Resident Fund Accounts.

Other Modules and Utilities:

Preadmission, Custom Reports, Passwords (HIPAA compliant), Reception, Quick link to PNP Support, HL-7 interface to send/receive data to/from third-party systems and vendors, and IS Activity Review.

Fax: 866-670-2234

E-mail: sales@pnpcomputer.com

Important Links:

The RMS system is fully integrated so that information entered in one module is immediately available to the other modules.

The Resident Financial Modules also may be linked to the General Ledger of the Financial Management System.
